FOR IMMEDIATE RELEASE

FCC Environmental Services Awarded Seven-Year Contract with City of Maitland, Florida

MAITLAND, Fla. – November 10, 2026 – FCC Environmental Services has been awarded a new contract by the City of Maitland, Florida, to provide residential and commercial waste collection services beginning April 1, 2027.

The contract was awarded by the Maitland City Council on November 9, 2026. The agreement includes an initial seven-year term, with two additional three-year extension options, and represents approximately $23 million in total backlog.

The new contract marks another step in FCC Environmental Services' continued growth in Florida and reflects a long-term commitment to serving the Maitland community. In preparation for the April 2027 service launch, FCC anticipates establishing a local team of approximately 11 employees and deploying more than 10 vehicles and pieces of equipment dedicated to the operation.

FCC will also invest in new carts and containers to support residential and commercial customers, helping ensure the people, equipment and resources are in place ahead of service commencement.

"We are proud to have been selected by the City of Maitland and look forward to beginning this new partnership," said Dan Brazil, President & CEO. "Our team is focused on being ready from day one with the people, equipment and resources needed to deliver safe, reliable and responsive service to Maitland's residents and businesses. We look forward to becoming part of the community and building a strong relationship with the City for years to come."

The Maitland contract further strengthens FCC Environmental Services' presence in Florida as the company continues to expand its municipal and commercial service operations across the United States.
